

SUMMARY

M.S. in Computer Science from National Cheng Kung University with experience in computer vision, deep learning, AI backend development, Docker deployment, and Linux/GPU infrastructure. Deployed a DDH AI system at **National Cheng Kung University Hospital**, won **1st Place at the 2025 TSMC IT CareerHack**, and published at IEEE ICMail 2023 as **first author**.

EDUCATION

- National Cheng Kung University (NCKU)** Tainan, Taiwan
M.S. in Computer Science and Information Engineering, GPA: 4.16/4.3 Sep. 2024 – Jul. 2026
 - **Thesis:** Deep Learning-Based Landmark Detection for Automatic Pediatric Hip X-ray Analysis
- National Taiwan Ocean University (NTOU)** Keelung, Taiwan
B.S. in Computer Science and Engineering, GPA: 3.8/4.0 Sep. 2020 – Jun. 2024

SELECTED PROJECTS

- Pediatric Hip Dysplasia AI Analysis System | NCKUH Deployment** Master's Research
PyTorch, YOLO, ConvNeXt, SimCC, FastAPI, Docker, SFTP  **GitHub**
 - **Clinical Deployment:** Developed and deployed an automated DDH analysis system at **National Cheng Kung University Hospital**, covering the deep learning model, GPU inference backend, Docker deployment, and SFTP-based image exchange.
 - **Model & Results:** Built a two-stage YOLO + ConvNeXt/FPN/SimCC landmark pipeline for automatic ACI and IHDI analysis; achieved **94.8% IHDI accuracy and 0.906 QWK** on MTDDH 5-fold cross-validation.
- Real-Time Enterprise Meeting Translation & Intelligent Q&A System** 2025 TSMC IT CareerHack – 1st Place
LLM, RAG, VAD, Flask, Socket.IO, Docker, JavaScript  **GitHub**
 - **Real-Time Translation:** Converted meeting speech into multilingual transcripts using VAD-based segmentation, with fuzzy matching to identify and correct domain-specific terminology.
 - **Meeting Q&A:** Used LLMs and RAG to search historical meetings by expressions such as “yesterday,” “last week,” or specific dates, supporting cross-meeting Q&A and summarization.
- Deep Learning-Based Underwater Image Restoration** Undergraduate Research
PyTorch, GAN, Image Enhancement  **Code**  **Paper**
 - Published as **first author** at IEEE ICMail 2023; developed a WaterNet + GAN-based restoration pipeline with quantitative color evaluation using K-means and CIEDE2000.

TECHNICAL EXPERIENCE

- NCKU VisionLab | AI Infrastructure & Server Administration** Taiwan
Linux, CUDA, NVIDIA GPU, Docker, NAS, LDAP/SSSD, Flask, Socket.IO Jul. 2025 – Jun. 2026
 - **Infrastructure:** Managed **10 Linux servers, 12 NVIDIA GPUs, and NAS storage** for approximately 20 lab members; provisioned GPU servers and maintained CUDA, Docker, SSH, LDAP/SSSD, user access, TLS, and CA certificates.
 - **Server-Monitor:** Developed a centralized CPU/GPU/server monitoring system for shared computing resources, used by **approximately 20 lab members for one year**.

TECHNICAL SKILLS

- **AI / ML:** PyTorch, YOLO, ConvNeXt, SimCC, OpenCV, LLM, RAG
- **Backend / Infrastructure:** FastAPI, Flask, REST API, Docker, Docker Compose, SFTP, Socket.IO, Linux, CUDA, LDAP/SSSD, NAS
- **Programming:** Python, C/C++, JavaScript, Java, SQL

HONORS & AWARDS

- 2022 ICPC Asia Taiwan Online Programming Contest – **Honorable Mention (Top 35%)**
- 2023 Information Intelligence Innovation Interdisciplinary Project Competition – **High Distinction**
